

## Sato Residence

**Sato is a farm family residence was built about 250 years from now**

**As an example of the legacy of the early houses built of the inner gate has the form of heavy snowfall in the land distributed Niigata Prefecture, in 1977 recognized the value of the period and shows the characteristics, we dismantle and repair, the original architectural appearance Has been restored.**

**This house features three floor plans to house the center of Hiroma type "living room" around the "DEI" (living room), "NIWA" (dirt floor) and from the middle gate is a form of Niigata, Akita, facing the Sea of Japan Distributed mainly in rural areas of Iwate Prefecture and MAGARIYAhas a different format**

**The building is 3 ~ 4m in winter as to withstand heavy snow, and thick pillars, feed into big things, for more consistent, I'm also surrounded by some creative ideas such as arranging to build a foundation of snow pond .**

**The living room and pillar and finish around Canna, try to stretch from the ceiling, the building was assumed that these ratings was the village headman of the region with the family.**

**There was the private school during the early period of the Tokugawa and Meiji "DEI" in the classroom, "living room" yard, "the second floor of the room" was used as the Academic Affairs Office**
